

Your motorbike is your pride and joy, but it can be frustrating when it doesn't run exactly how you want it to.

Ed loved his GSXR750, but at over 6 foot tall, long rides were difficult. His legs were just too long to sit comfortably.

Magna Fabrications designed and manufactured custom plates to lower the foot rests on Ed's bike, and now he's able to go on those long weekend rides he'd always dreamed of.

We design and manufacture bespoke parts, to your exact specification. Perhaps you know what you need, but you don't have the engineering skills or the machinery to make it yourself. Or you know what you want to achieve, but you don't know *how* to achieve it. Our qualified engineers with decades of experience in the motorcycle industry will work with you to design the perfect part.

Call today on [\[REDACTED\]](#) to make your motorbike dreams a reality.
